

<b>FALSIFICATION OF HISTORY</b>	
<b>Money, Money, Money</b>	

2115 GD

*What happens if it STOPS making the world go round?*

1 It's a man's world, according to James Brown.  
 ABBA, on the other hand, told us it's a RICH man's world.  
 While Liza Minelli said, money makes the world go round.  
 Whoever's song you agree with, we can all be sure of one thing.  
 A financial crisis is looming – but WHY?

2 It is now becoming painfully clear that *The Economy* is a lot like a sandcastle – and now the tide's coming in.  
 I was delighted to find a plain English explanation of why we can expect a financial crisis – who will lose out – and who will gain.

3 "It's an ill wind that blows nobody any good" is such a true proverb.  
 It seems that there's almost nothing, no matter how horrific and destructive for some people – nearly always the vast majority of ordinary folk – that doesn't help some other people. These other people gain in some way – an increase in wealth, an increase in power or both, usually.

The financial crisis is no different. Horror stories abound on the Internet about it, many of them based on fear – and frankly, opportunism. "If you buy my book/prospectus/advice you can save yourself and your family from disaster" – that sort of message.

Opportunism is nothing new, of course. Combined with greed and a lack of moral values – a lack of integrity is another way of putting it – it appears that the causes of the looming financial crisis can be expressed simply as – all of the above.

4 "[World Financial Crisis in Simple Terms](#)" was published in 2018 by a geopolitical researcher, John Hamer, on his fascinating website "[The Falsification of History](#)."

World Financial Crisis in Simple Terms is the story of Helen (not me!).

Helen owns a pub. Most of the pub's customers are unemployed alcoholics who can't afford to drink in her pub. The pub is in danger of going bust.

Helen solves the problem by coming up with a fantastic idea - drink now, pay later!

What could possibly go wrong? you might ask.

It is heart-warming to know who survives and who goes to the wall – *NOT!*.

I do recommend reading this short, thought-provoking, parable which - for me at least – explains beautifully how the economy works – and *who it works for!*
