## Fauci: How Is He Still Here?

MA-3325C

*The power this man has is extraordinary. Is it just about the money - Or?*

- 1 Dr Anthony Fauci is known throughout the world now – having appeared on every TV screen from 2020 forward - talking about the deadly virus spreading around the world and his endeavour to find a vaccine to combat it.

He stood alongside successive US presidents, in the White House press room, telling Americans – and the rest of the world – what his scientists were doing to track down the virus and - what people should be doing to protect themselves from the deadly disease. People will remember his advice – echoed by others - about stay at home, isolate and wear a mask!

- 2 Speaking of advice, I could find no record of this guru of science – officially a doctor of medicine - giving any advice about how people could better protect themselves ahead of a life-saving vaccine – aside from isolation and mask wearing that is. In this way he was no different from the top scientists in the UK at the time of Covid.

Neither **Prof Chris Whitty** nor **Prof Patrick Vallance** spoke once about the importance for each of us to get out in the sunshine, or to ensure that we all had adequate levels of vitamins C and D3 levels in our systems. These simple strategies are so easy to effect and are amazingly cheap. But not once did any of these top advisors to the government speak of them. Why?

This was an omission which didn't go unnoticed by thousands of medics and scientists around the world, but their voices were silenced. Why would that be you might wonder? One could be forgiven for thinking, they purposefully wanted people to avoid protecting themselves in the way we all could have.

Additionally, they only ever talked about the life-saving vaccine – which, if all went well, in 18mths or sooner hopefully – will be ready to give to the whole world – all 7billion of us. And people will remember being told through the media that none of us will be safe until all 7billion are vaccinated.

An interesting statement to make ahead of the vaccine being available!

Hearing all this from these people did give me cause for concern. Firstly, knowing about the positive effects of vitamins to combat the disease by boosting our immune systems. That point alone started to ring my own alarm bells. Secondly, hearing the enthusiasm each of them had for the vaccine which was now being prepared on the hurry-up, caused me to wonder, like so many others. Most people are aware that vaccines take a long time to go from inception to licence – allowing distribution to the population. Typically, it can take a minimum of 10yrs to prepare, test and certify before being unleashed on the market.

There are some who point to indications that the vaccines were in preparation before the official outbreak of Covid in early 2020. But what would that mean if that were true?

Anyway, all the above paints a scant backdrop to what was going on – and not going on – during the course of 2020 – when we were all coming to terms with a major health threat in the world.

- 3 **Dr Anthony Fauci** was in effect the world's number one voice on the subject of Covid and the *go-to* person for the latest advice for us all to follow. For a slightly detailed background on the man, [Wikipedia has more](#).

The thing is, not everyone bought into his story. There were the doubters – as I personally confess to have been – being the ones that sensed in some way a flaw in the man's advice, with something missing from his narratives. More importantly perhaps, there were those doctors, scientists and lawyers who had been following the man over the many years he had held high-profiled positions in US government health agencies.

One man among them being **Robert F Kennedy Jr** RFK - an accomplished prosecuting lawyer by profession and nephew to the assassinated US president **John F Kennedy**. RFK has written a book specifically about Tony Fauci and it is to this book that I turn now for a deeper look into the life and work of this apparent top-notch advisor on health.

The book is titled: **The Real Anthony Fauci**.

It is available from all good book retailers. [Amazon](#) provides a sample read.

- 4 Decades before Covid was thought of, there was another pandemic which had the effect of scaring the life out of people in the **1980s**. AIDS.

Before that, the situation was interesting.

What follows is a series of short extracts from RFK's book about Fauci and the history of health - and treatments for health - in the United States.

The organisations quoted in this series include:

**CDC** - The Centers for Disease Control and Prevention

**FDA** - Food and Drug Administration

**HHS** - Department of Health and Human Services

**NCI** - National Cancer Institute

**NIAID** - National Institute of Allergy and Infectious Diseases

**NIH** - National Institute of Health

The names quoted in this series include:

[Peter Duesberg](#) – Contested connection between HIV and AIDS

[Kary Mullis](#) – Inventor of PCR test and critic of Dr Fauci

[Robert Gallo](#) – Asserted HIV as the infectious agent causing AIDS

[Richard Krause](#) - Director of NIAID before Dr Fauci

[Samuel Epstein](#) - Made contributions on avoidable causes of cancer

[James Curran](#) - From 1981 led the task force on HIV/AIDS at the CDC

The short extracts from the book are shown in *italics*.

Extract: P-130

*As early as 1949, congressional bills to abolish CDC because of the remarkable decline in infectious disease mortalities, twice won by impressive majorities. From the mid-1970s CDC was seeking to justify its existence by assisting state health departments to track down small outbreaks of rabies and a mouse disease called hantavirus and by linking itself to the military's bioweapons projects. The CDC increasingly needed a major epidemic to justify its existence. According to Peter Duesberg - author of *Inventing the AIDS virus - the HIV/AIDS theory was salvation for American epidemic authorities.**

Better hygiene, sanitation and diets had a material, noticeable and positive effect on the people's health across the entire nation. People were becoming healthier without the aid of pharmaceuticals.

Extract:

**Kary Mullis** – a man with no respect for Dr Fauci - *similarly recalled the institutional desperation during the Reagan administration era. He said of the CDC: "They were hoping for a new plague. Polio was over. There were memos going around the agency saying, "We need to find the new plague - we need to find something to scare the American people so they will give money." NIH scientist, Dr **Robert Gallo** who'd become Dr Fauci's partner, co-conspirator and confidant offered a similar assessment.*

*Regulators were allowing Pharma to craft public health policy behind closed doors. Director Richard Krause whom Dr Fauci would shortly succeed, invited Merck executives to sit in on internal planning meetings as collaborators. Working with Merck, NIAID used taxpayer funds to subsidise development and distribution of vaccines and to rush untested products to market. But the swine flu pandemic was a dud and HHS's response was a global embarrassment. Only one casualty, a soldier at Fort Dix, succumbed to the pandemic and Merck's experimental vaccine triggered a national epidemic of Guillian Barre syndrome, a devastating form of paralysis resembling polio before regulators recalled the job.*

It's interesting to note, the vaccine brought to market to combat Swine Flu – judged as deadly at the time – was withdrawn once the negative side-effects of the vaccine were clear for all to see. In contrast, there hasn't been any hint of a withdrawal of the C19 jab – despite the many thousands of reports detailing the negative side-effects people have suffered. All we have seen is the quiet discontinuing of certain makers' products. No admission of error has been heard from any government around the world. Why?

Extract:

*Despite those catastrophic outcomes Dr Fauci's take away from the 1976 swine flu crisis seems to have been the revelation that pandemics were opportunities of convenience for expanding agency power and visibility - and for cementing advantageous partnerships with pharmaceutical behemoths and for career enhancement. Four years later the AIDS pandemic proved a redemptive juncture for NIAID and the launchpad for Dr Fauci's stellar rise. The lessons he learned from orchestrating regulatory responses to the AIDS crisis would become familiar templates for managing subsequent pandemics.*

The way **RFK** couches his narrative on **Dr Fauci**, paints the doctor as an orchestrator of fear with an intention to increase the power of the various health agencies he is so closely connected with. It's as if he was also acting as an agent of Big Pharma itself – with a remit to invent diseases simply to ensure an expanding market for pharmaceutical products into the future.

5 A diversionary look at cancer.

Extract: P-132

*In **1971** president Nixon had launched the "War on Cancer". The medical establishment promised a cancer cure by **1976**. Instead, Big Pharma quickly transformed NCI into its cash cow as captured regulators funneled hundreds of billions of dollars into single purpose patented cancer remedies and wonder drug production that the agency developed with pharmaceutical company partners.*

*The money enriched Big Pharma researchers, doctors and universities but yielded little net public health benefit. **50** years and **\$150 billion** later, soft tissue, non-smoking cancers have increased dramatically. NCI ever sensitive to offend Big Pharma, Big Food, Big Ag and Big Chemical had spent almost nothing to address public exposures to carcinogens from medicines, vaccines, meats, processed foods, sugar and chemical laden agriculture. Mainstream cancer research suggests that one third of all cancers could be eliminated through lifestyle changes. But according to cancer expert **Samuel Epstein**, NCI spent just one million - that is 0.02% of its \$4.7 billion budget in 2005 - on education press releases and public relations to encourage better eating habits to prevent cancer.*

There's an organisation called **The Truth About Cancer** and their strap line used on a documentary film series suggests – no one needs to die of cancer. It was formed by husband-and-wife team, **Ty and Charlene Bollinger**.

The documentary films they've produced are enlightening in so many ways. Not least, by drawing attention to the fact, the standard western cancer treatments of chemotherapy, radiation, and surgery can be as damaging and deadly as the disease itself. They say the absolute best way to beat cancer is to prevent it from occurring in the first place.

The pharmaceutical industry knows that there's little money to be made in cancer prevention, which is why all of their efforts focus on expensive drug treatments.

The nine-part series of documentaries is a must-watch for anyone wishing to understand more of what is going on in the cancer industry.

- 6 If **Dr Fauci** and Big Pharma were really looking for a pandemic to scare the American people into awarding his agency and corporate partners more money, then they found it – it was called the AIDS pandemic.

Extract: P-133

*For Big Pharma and its NCI regulators and enablers, the AIDS crisis looked like another ATM machine. But in 1984 NIH scientist Robert Gallo linked AIDS to his virus HTLV-111 which in time would be renamed the human immunodeficiency virus HIV. Dr Fauci then moved aggressively to capture that revenue stream for his agency. In a dramatic confrontation with NCI's Sam Broder that year, Dr Fauci persuasively argued that since AIDS was an infectious disease, NIAID must have jurisdiction. His victory over NCI in that tip-off placed Dr Fauci in position to capture the sudden flood of congressional AIDS appropriations flowing to NIH through the adept lobbying of a well organised AIDS community then besieging the Capitol for resources to study and treat the "Gay Plague".*

Basically, it was in the early 1980s that the gravy train really kicked into gear. Extract:

*In 1982 congressional AIDS funding was a pitiful \$297,000. By 1986 that number jumped to \$63 million. The following year it was \$146 million. By 1990 NIAID's annual AIDS budget was \$3 billion. But Gallo's HIV/AIDS hypothesis proved a PR windfall for Dr Fauci as well.*

*"Once people recognized that this [AIDS] was caused by a virus, records the CDC's James Curran, "Media attention went from no news coverage to the most covered news story in history. People went from neglecting it to fear and panic".*

*The expanded flow of cash spelled opportunity for Dr Fauci, "AIDS was his big chance" wrote historian and journalist Bruce Nussbaum who penned the definitive history of early AIDS research.*

*The terror of pestilence it turns out is a potent impulse and Dr Fauci was adept at weaponizing it and he quickly learned that other respected authorities would follow his lead. Following Dr Fauci's fear mongering prophecy the president of the AIDS Commission made the astonishing forecast that within 14 years - double the number of people then on the planet would be dying from lethal infections: "If the spread of AIDS*

*continues at this rate, in 1996 there could be 1 billion people infected; Five years later hypothetically 10 billion.*

Few people on the planet at this time knew or believed these projections were grossly inaccurate. But the fear mongering had its effect both on the population and on Big Pharma's bottom line.

The scare tactics were soon rolling thick and fast for AIDS. The question to keep in the back of our minds is, have we seen this tactic rolled out again starting in **2020** related to a different pandemic? Whatever the truth is, it would be a good thing if certain people – if not ourselves – did some deep questioning. There are things about the AIDS story which raise some deep concerns. Concerns about Big Pharma, Dr Fauci – and also governments. Extract:

*Dr Fauci's embellishments quickly made HIV-positives the modern equivalent of lepers. Paranoia of AIDS from non-sexual contact persisted for years. In New York in **1985** for instance **85%** of schoolchildren at one public elementary school stayed home during opening week while hundreds of parents demanded the school system bar any HIV-positive children from attending classes.*

*AIDS activists further complained that Dr Fauci lacked sensitivity and human compassion toward people suffering from the disease. His laser focus on the single magic bullet antiviral left Dr Fauci reluctant to study drugs that treated the constellations of grave infections that tortured and killed people with AIDS. Patient care which typically involved off the shelf drugs was incompatible with NIAID's mushrooming mercantile obsession with higher-price patented antivirals.*

Dr Fauci's lack of compassion was seen again in relation to Covid. What was also seen so very clearly, was not only his disinterest in cheap effective drugs to treat C19 patients – but his positive attack on those drugs and any doctor who voiced support for their use. And so many did.

He was joined in those attacks on the cheap, effective drugs – and the people voicing support for their use – by all those individuals within his wide network of associates. He was a loyal friend and supporter of Big Pharma and their expensive solution for combating C19 across the entire planet.

See the **CONNECT** article:  
[Cheap Drugs – The Real Truth : M-3145VB](#)

Dr Fauci and associates identified the drug AZT as the ONLY go-to drug available and authorised for use to combat AIDS. It was as if he and his associates saw a wonderful money-making opportunity centered on AZT – when in effect AZT made AIDS patients even more sick.

Extract:

*Dr Fauci's campaign to sabotage therapeutic remedies played a key role in precipitating the emergence of the organized underground medical network. So-called buyers' clubs filled the vacuum by providing treatments that community doctors and their patients considered*

*effective against AIDS but that FDA refused to approve. "Dr Fauci was a liar" recalls Melisa Wallack who researched Dr Fauci intensely for her film-Dallas Buyers Club.*

*Wallack continued, "He was utterly beholden to pharmaceutical companies and was hostile to any product that would compete with AZT. He was the real villain of this era. He cost a lot of people their lives".*

Screenwriters **Melissa Wallack** and **Craig Borten** researched intensely the NIAID institutional hostility to patient care and repurposed drugs during the **1986** AIDS crisis. They won Oscars for the [Dallas Buyers Club](#) film. It's a good watch and stars, **Matthew McConaughey**.

Extract: P-218

### **Refusal To Debate**

For several years, journalist John Lauritsen tried to get any scientist at NIH to answer the questions in Peter Deusberg's article. But the orders had come from NIAID that no government scientists should respond. NIH officials repeatedly told Lauritsen that none of the scientists for Robert Gallo in government were interested in discussing the etiology of AIDS. Lauritsen was therefore intrigued when the New York Times reported Dr Fauci's laconic official response to Deusberg's article: "The evidence that HIV causes AIDS is so overwhelming that it almost doesn't deserve any discussion any more."

This is their way of saying that the science is settled – one would guess? It is somewhat difficult to understand how such people can get away with such behaviour – in public as it is – so simply. There are things here to be learned by us all.

Extract:

*Dr Fauci's only strategy was to act as if the evidence was so clearly overwhelming that no one should be allowed to question the assertion. Dr Fauci adopted the posture that neither he nor his colleagues had any obligation to reply to Deusberg or any of his other critics. It was the secular version of the doctrine of papal infallibility; Everyone must accept the AIDS virus theory as a matter of fact because the public health 'Pope' declares it.*

When one considers the number of lives that were hanging in the balance at that time – the lives and deaths of AIDS patients being dependent upon this one man – what was happening then goes beyond comprehension. This guru - with seemingly magical powers to not only stay in power but dictate how that power is used on all health matters – is a thing that should have told the world to be on its guard.

Apparently, the world was not on its guard when the Covid thing happened with the guru still in position – and now with even more power.

Extract:

*Harvey Bialy - founding scientific editor of Nature Biotechnology said, "I am very tired of hearing AIDS establishment scientists tell me they are too busy saving lives to sit down and refute Peter Deusberg's arguments - although each one assures me, they could do it in a minute if they had to.*

*In 2006, Britain's preeminent epidemiologist Gordon Stewart voiced a similar frustration: I have asked the health authorities, editors in chief and other experts concerned with HIV/AIDS, repeatedly for proof of their thesis- and I've been waiting for an answer since 1984.*

*Dr Fauci's own refusal to debate his theories is just the tip of the iceberg. Dr Fauci's control of his PI (Principal Investigator) army gives him the ability to shut down all debate. When National Public Radio attempted to stage a conversation between Deusberg and a supporter of the HIV hypothesis it could find no one willing to confront him. Critiquing a dubious theory would take time away from more productive efforts - Fauci, head of NIAID, told NPR producers.*

In relation to Covid, there has been a complete rerun of the same story – a story of NO DEBATE – SCIENCE IS SETTLED.

Dr Fauci was recorded as saying – in relation to Covid – an attack on me is an attack on science itself. Could this man be any more arrogant?

The worrying thing is – this man gets away with it. In another universe, he would be tested on the spot and - most likely – given his marching orders. He hasn't been, and that is more than a concern. It's as if there is some kind of agenda at the highest levels being played out that protects the man.

Extract:

*Bialy challenged Dr John Moore of Cornell University to a debate on AIDS. Moore wrote in reply: "Participating in any public forum with the likes of Bialy would give him a credibility that he does not merit. The science community does not debate with AIDS denialists, it treats them with the utter contempt that they deserve and exposes them for the charlatans that they are. Kindly do not send me any further communications on this or any related matter."*

Again, the world has seen exactly this behaviour and response from these people in relation to Covid. Anyone who challenges their official narrative gets attacked, shunned and silenced. Does this sound like the behaviour of an intelligent Grown-Up Society to you? If the science was so clear, then a competent scientist should be willing and able to lay out their theory – with proofs – without any trouble. But that didn't happen with AIDS as we are being told – and it didn't happen with Covid either.

Does this make us all think? It should!

Extract:

*Such scathing rebuffs infuriated Nobel laureate Kary Mullis. In 2004 he said, "All we have is Bob Gallo saying, "Gentlemen this is the cause of AIDS." "That's all we have - that's all we had - that's not enough - that is not sufficient to publish even a meagre little scientific paper somewhere - much less a basis to spend millions or billions of dollars a year and the cost of a lot of lives and anguish. Lives have been totally ruined on the basis of some flimsy little statement made by a guy who's known to be a crook in lots of other ways. He lied about a whole lot of other stuff. Why are we trusting him?"*

*If he was a witness in a courtroom, we wouldn't trust his testimony. We've caught him in too many lies. We don't trust him any more."*

Extract: P-220

### **All About the Money**

*Today the presumption that HIV is the sole cause of AIDS is the central presumption of a multi-billion-dollar industry. Everyone agrees that at least part of the explanation for its stupefying resilience is Dr Fauci's relentless flow of cash. "Look there's no sociological mystery here" observed Mullis. "It's just people's income and position being threatened by the things Peter Duesberg is saying. Their personal income and positions are being threatened and that's why they're so nasty. In the 1980s a lot of people started being dependent on Tony Fauci and his friends for their livelihood. All these people really wanted success in the sense of lots of people working for them and lots of power."*

*Bialy agrees: first of all, there are tremendous financial and social interests involved. Billions of dollars in research funding, stock options and activist budgets are predicted on the assumption that HIV causes AIDS. Entire industries, pharmaceutical drugs, diagnostic testing and activist causes would have no reason to exist.*

*The 2004 documentary 'The other side of AIDS' includes a remarkable scene in which Canadian PI Mark Wainberg, MD - president of the international AIDS Society, the world's largest organisation of AIDS researchers and clinicians - angrily calls for Deusberg and others - who attempt to dispel the notion that HIV is the cause of AIDS - to be brought up on trial. He considers HIV/AIDS skeptics perpetrators of death. "I suggest to you that Peter Duesberg is the closest thing we have on this planet to a scientific psychopath." Then he declares the interview over, rips the microphone from his lapel and storms off. What happened next was revealing. The audience erupted in laughter which turned to boos as the screen flashed the list of Wainberg's patents and other financial ties to the HIV industry.*

### **DEUSBERG'S THEORY**

*Deusberg, Mullis and their school of critics blame all the lethal symptomology known as AIDS on a multiplicity of environmental exposures that became ubiquitous in the 1980s. The HIV virus, this group insists, was a kind of free rider that was also associated with overlapping lifestyle exposures. Deusberg - and many who have followed him - offered evidence that heavy recreational drug use in gay men and drug addicts was the real cause of immune deficiency among the first generation of AIDS sufferers. They argued that the initial signals of AIDS Kaposi's sarcoma and PCP were both strongly linked to amyl nitrate - poppers - a popular drug among promiscuous gays. Other common wasting symptoms were all associated with heavy drug use and lifestyle stresses.*

*The critical AIDS cases in the 1980s were among men engaged in behaviors then commonplace in the post-Stonewall drug-charged gay*

*party scene. Risk factors included promiscuous sex with multiple partners and cumulative toxic exposures from psychoactive drugs including methedrine, cocaine, heroin, LSD and a cocktail of antibiotics prescribed to treat ubiquitous sexually transmitted diseases. On average the early AIDS patients had been on at least three antibiotic courses in the year preceding diagnosis.*

**Peter Deusberg** understood very well what was going on in the gay scene in **San Francisco** in the **1980s**. He knew that what the men were putting into their bodies was a lethal cocktail of drugs and poisons – the cumulative effect of which – he asserted – was to crash their bodies' immune systems. But as we have seen from the text – Dr Fauci would not accept that this fact was the cause of AIDS for these people. He had other *monetary-based* ideas!

The campaign to scare people about AIDS unleashed the loud calls from the gay community to be given the drug AZT. Some say, that was exactly what Dr Fauci wanted to hear.

### **KARY MULLIS**

Kary Mullis invented the PCR test – used extensively to test for the C19 virus. Kary Mullis stated that the PCR test should not be used to search for a virus and was perfectly clear about that. Kary Mullis died in late **2019** just before the Covid outbreak - in what some describe as suspicious circumstances. Kary Mullis would have spoken out strongly about his view of Dr Fauci and the erroneous use of the PCR to test for C19. In a sense, his untimely death opened a pathway forward for Dr Fauci and the Covid story.

Kary Mullis was yet another scientist Dr Fauci would not debate with. Why?

View the [Kary Mullis compilation](#) of short video clips.

There are more links for Kary Mullis in **Further Reading**.

- 7 One of the most illuminating documentaries produced on the above story about AIDS and Dr Fauci was produced by **Brasscheck**. The documentary is called: [AIDS: FAUCI'S FIRST FRAUD](#)

It's not difficult to draw some astonishing parallels between the AIDS story and the more recent Covid story. Same man, same Big Pharma interests and the very same tactic to spread fear with everyone. The truth is out there – but the only way it will be revealed is by questioning – and honest answers.

PS1 Acknowledgement is hereby made to the author of the illuminating book - **The Real Anthony Fauci** - by **Robert F Kennedy Jr**. I have read the greater portion of it – I can say there is not one sentence wasted. It's a masterful piece of work and referenced to an astonishing level of detail throughout. I recommend anyone to read it. Read it and then ask yourself questions.

Keep in mind that Anthony Fauci could – but hasn't – filed a defamation case against the author. He is certainly wealthy enough to do that.

PS2 In his book, **Robert F Kennedy** touches on **Bill Gates** – the other guru in the world when it comes to healthcare and vaccines. RFK tells us about this man and his connection with the WHO – the organisation he largely funds.

I will cover this subject in a future article based upon Robert Kennedy's book. That future article will conclude this 3part series of exposures on the world healthcare industry – based upon the dedication and work by RFK, a giant among men – a man whose made tremendous effort to gift us things to question.

### THE HISTORY BOOK – THB

We have compiled a repository of interesting articles across a wide range of subjects – cross-referenced in many cases - all freely accessible to you and all our interested readers.

The articles take the form of webpages, PDFs, audios and videos - accumulated from a growing worldwide network of sources and authors.

Articles previously published on the CONNECT-m3 website – are filed in the [LIBRARY](#) section of **THB**. Filed in the [BANK](#) section are articles held for general reference and expanded research.

Further articles relative to the subjects covered in *this* magazine article can be read under their respective headings, in our different **Reading Rooms**.

**The History Book** is already a compendium of immensely valuable information and - with records being added every week - is rapidly expanding to become a unique source of reference on many important and major topics of our time.

Access to thousands of articles, on the expanding array of subjects, is FREE - providing for you - our reader – an easily accessible reference library within a few simple clicks 24/7. Please do enjoy!
