

SHOW NOTES

Meet: CHARLET CRICHTON	
I Was Fit, Healthy and Enjoying Life	

2411 A

From late on in **2020**, the whole country was being encouraged and herded to do the right thing. Politicians of every colour took turns in front of the camera to tell us all – just how important it was to get the jab when our turn came. And in the New Year – in the early months of **2021** - we even saw PM BoJo take his turn – as he told us he did. He said he didn't feel a thing. The thing is – others did – and it turned out to be an ongoing nasty thing!

At first - It was one here and one there.

Then people talked and learned that they weren't the only person in the world – or in their own community even - who had been affected by the jab. Those we pay to ensure our safety – assured us all authoritatively - that the jab was Safe and Effective! CEO **Dr June Raine** – head of the [MHRA](#) and UK's once upon a time medicines watchdog BUT now turned enabler for the Big Pharma industrial complex – said the MHRA has world renowned robust standards - to test Safety, Quality and Effectiveness.

In truth – it hasn't – and neither is the jab they authorised, safe and effective!

The truth of that is explained by the many thousands now – hundreds of thousands in fact around the entire world. Charlet is one of those affected.

Charlet was just like most lucky people. She had a full and healthy life, enjoying the things she liked doing best – including helping others through her business working as a sports therapist - and a volunteer to help home animals and also homeless people.

Charlet – in **February 2021** - could see the point our trusted politicians – our trusted media and – our trusted and beloved NHS – were all making. As one person said "I took the jab for the Team – meaning the whole UK Team. That lady, **Georgia**, is now vaccine injured just like Charlet. Their stories are told in a recently released documentary, [Safe and Effective – A Second Opinion](#).

In this podcast, we learn something of Charlet's plight - a plight made so much worse by the fact that those same trusted politicians – our trusted media and – our trusted and beloved NHS – are not interested to hear from her – or the other thousands of vaccine injured people just like her – who also took the jab for the Team.

With her precious and uplifting human spirit - which given her daily life struggles, almost defies belief – Charlet turned her life to helping all those others in the Team who are just like her – injured and being ignored.

Charlet is the founder of [UKCV Family](#) – a support group for those needing a friendly person to speak with – providing a compassionate listening ear and encouragement to face another day of living in trauma – ignored by the state.

What these people are enduring is almost beyond belief and the list of their symptoms – with little doubt, triggered by the jab - seems never ending. Whilst listening to Charlet, we must all be asking these questions. When we were all being encouraged – even coerced – to take the jab – *because it was the right thing to do for others - plus we wanted our lives back:*

Why are those now injured ignored in GP surgeries?

Why are so many of the politicians turning a blind eye?

Why is it the media will not report these people's stories?

Why are these stories wiped from social media when posted?

WHY?

When we have the answers to these questions – we sense the whole world will be on the verge of spinning in a different direction. A direction in which such a mistake – if it was such – will never happen again. It will never happen again because the family – the BIG planet-wide family consisting of all 7billion of us - will be doing things differently from there on!

And speaking of *things* – before the world does spin differently – there's this. The Big thing right now – with the same politicians – the same media and – the same NHS - oh and an MHRA which no longer does the dog watch, but now feeds the animal a juicy, financially rewarding bone instead - we are all at risk of being affected just like Charlet. And that could happen when our next turn gets announced – our turn taking the next jab they want us to have.

With the jab still being pushed into people - is it just a matter of time before one of us - one of us still lucky ones - enjoying a full and healthy life, just like Charlet had been – becomes another statistic - a ONE chance in 80 statistic! The question on people's lips could now be...

"Will I take one for the Team, next time?"

Well, should you?

CONNECT'S Maxim and Oath

Connect is only interested in finding and sharing the TRUTH.
In search of that TRUTH, we only pose questions – we have no answers.
